

Committee Update – HW/FUL/18/00490 – 60 Hare Street Springs

Five further public comments have been received. They object to the proposal on similar grounds as the previously received objections (including character and appearance, neighbour amenity, parking and highway safety, and behaviour of the occupants), which have been discussed and addressed in the report.

Two representations raised concern regarding property values, but this is not a material planning consideration and cannot be taken into account in the determination of this application.
