

REPORT TO DEVELOPMENT MANAGEMENT COMMITTEE

13 January 2021

REFERENCE: HW/FUL/18/00553

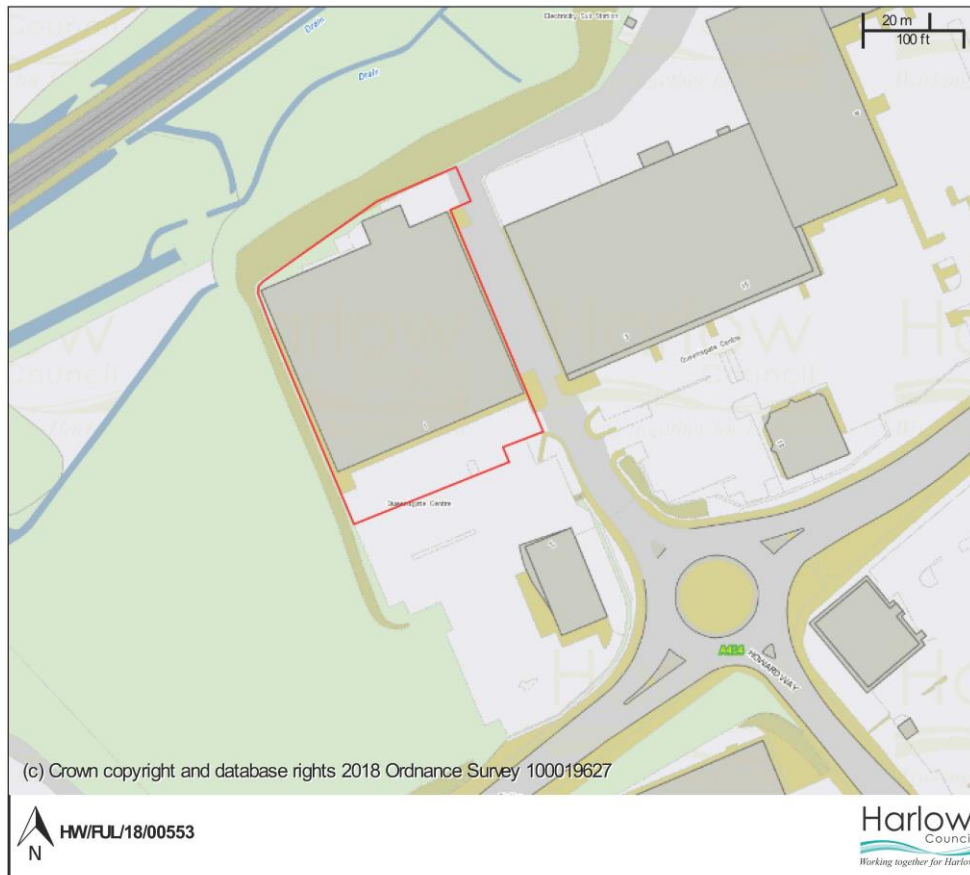

OFFICER: Patricia Coyle

APPLICANT: The Crown Estate

LOCATION: Proposed 1A
Queensgate Centre
Edinburgh Way
Harlow
Essex
CM20 2DA

PROPOSAL: Minor External Alterations to Elevations of Unit 1A to Accommodate a Food store (Class A1) and Reconfiguration of Car Parking.

LOCATION PLAN

This map is based upon Ordnance Survey material with the permission of Ordnance Survey on behalf of the Controller of Her Majesty's Stationery Office © Crown copyright. Unauthorised reproduction infringes Crown copyright and may lead to prosecution or civil proceedings. Harlow District Council Licence No.100019627 (2015)

Reason brought to Committee

Two objections received.

Application Site and Surroundings

The application site comprises part of the former Toys “R” Us unit to the western end of the Queensgate Centre, comprising a retail park circa 1.5km from Harlow town centre. Other retailers and a number of leisure and restaurant uses.

The site is accessed from Edinburgh Way at its roundabout junction with Howard Way. There is a further egress only towards the eastern end of the site again onto Edinburgh Way.

Details of the Proposal

Minor External Alterations to Elevations of Unit 1A to Accommodate a Foodstore (Class A1) and Reconfiguration of Car Parking.

The proposal is for full planning permission for minor works and, in effect (although not a Section 73 – variation of condition - application), a new planning consent for this unit that would supersede the restrictions currently in place through Condition 1 of planning permission reference HLW/92/0107 and Condition 3 of permission reference HW/FUL/18/00097 to extend the range of goods to allow the sale of food and drink from the premises to facilitate occupation by Lidl. The physical works proposed include the reconfiguration of the existing car park and minor alterations to the front, side and rear elevations.

Permission is required for food retail as there is a condition on the original approval restricting the types of goods which can be sold from the out-of-centre retail warehouse unit. The Planning Statement indicates that the proposal also involves varying Condition 1 of Planning Permission HLW/92/0107 and Condition 3 of HW/FUL/18/00097 although this is not explicit as this current application is a full application for approval of a foodstore (rather than a Section 73 application for removal or variation of a planning condition). Notwithstanding, the effect of an approval would be the same.

Currently the Unit 1 Queensway unit(s) within the Edinburgh Way Retail Park can only sell DIY goods, furniture, floor coverings, leisure and garden products, motor accessories, electrical goods and toys, bicycles, computers, baby/ancillary child-related products and other non-food bulky goods care items.

The external elevation changes would be to the front, side and rear of the building and would involve the glass canopy being extended over the entrance, alterations to entrance doors, removal of an internal door, new fire exit doors to the rear and side elevations, installation of a trolley bay and installation of bollards along the front elevation.

The car park reconfiguration would result in minor changes to the shared car park in front of the whole of the existing retail warehouse unit – Unit 1 Queensway. It is indicated in the Transport Assessment that there would be demand for 49 parking spaces during the weekday afternoon and 51 spaces during the Saturday afternoon peak hour.

The proposal would benefit from the recent sub-division of the existing Unit 1 into three of which the proposed food supermarket (Unit 1A) would utilize the largest space of 1,952 sq.m by gross internal area with a net sales area of 1,100 sq.m. Unit 1C has been taken by Smyths Toy Superstores and Unit 1B, the smallest/narrowest, has yet to be occupied.

It is proposed that there would be 45 full-time equivalent jobs.

The applicant indicates in their Planning Statement that the proposal is to enable Lidl, a LAD (Limited Assortment Discount) type food and drink supermarket with WIGIG (when its gone

its gone) comparison goods “middle aisle” to operate from their existing vacant unit in Edinburgh Way. The existing Lidl store at Staple Tye would remain.

The applicants have submitted a transport assessment, a draft travel plan, a statement of community involvement and both a Sequential Test Statement and a Retail Impact Assessment (Dec 2018, revised in November 2020) in support of their application. The applicants have put forward the argument that their proposal would neither result in any harm to the local highway/transport network nor result in any harm to the vitality and viability of Harlow Town Centre and, as there are no available units within the Town Centre or in edge of town centre locations, that the proposal meets the requirements of the Sequential Test.

RELEVANT PLANNING HISTORY

Application Reference Number: HW/PL/08/00061

Proposal: Refurbishment of existing building including alterations of south and east elevations and reconfiguration of car park (Toys R Us)

Application Status: Granted

Date Application Received:

Date Application Decided: 1 April 2008

Application Reference Number: HW/PL/08/00218

Proposal: Replacement and enhancement of three existing signs and installation of 1 new fascia sign (Toys R Us)

Application Status: Consent given

Date Application Received:

Date Application Decided: 2 April 2008

Application Reference Number: HW/FUL/18/00097

Proposal: Alterations to External Appearance including new shopfront and entrance features to support sub-division

Application Status: Granted planning permission

Date Application Received: 5 March 2018

Date Application Decided: 16 May 2018

The sub-division of Unit 1 Queensgate into three units did not of itself require planning permission as it met the requirements of the condition attached to the original consent in that it did not involve the provision of undersized units.

Two applications were submitted for the whole of the warehouse unit - Unit 1 Queensgate - in October 2018 prior to the submission of the current application:

- HW/FUL/18/00097 (see above). This also included the change from one sign housing with upstands to the frontage to three with additional entry doors beneath all three.
- HW/FUL/18/00459 - Alterations to Servicing Arrangements for Unit 1C, including external alterations to the side elevation of the unit and minor physical works to the car park and site layout – this was granted planning permission on 6 December 2018. This also included the change from one sign housing with upstands to the frontage to three with additional entry doors beneath all three.

Also, during the course of consideration of this application a number of applications have been made which affect the area of the site within the red line for the current application as follows:

- Advertisement consent - HW/ADV/20/00149 – plans submitted with this application show Unit 1C as covering the eastern (nearly half –approximately 28m wide) side (front to rear) of the current application site. Signage for Smyths Toys superstores proposed to be located on the front elevation in the upstands and on the eastern elevation at high level was approved on 5 May 2020.
- Unit 2 Queensgate – (HW/FUL/20/00396) - Alterations, including minor extension to existing building, and re-introduction of drive through lane, alterations to car parking and continued use of property for Use Class A3 (food and drink) and Use Class A5 (takeaway) i.e., Restaurant and drive-through. The proposal mainly affects the access/parking arrangements by removing 6 existing parking spaces – Granted planning permission on 12 October 2020. The removal of 6 parking spaces would not specifically alter the number needed for the proposed food store in the shared car park.

CONSULTATIONS

Highways Agency

No response received.

Highway Authority

No objection received.

Regeneration

The potential for Lidl to become an occupier in the Queensgate Centre is one that we wish to encourage as it would provide additional employment for the town and help to replace at least some of the many retail jobs that have been lost as a result of the impact of the Covid-19 measures and the longer term trends in the town.

Neighbours and Additional Publicity

Number of Letters Sent: 4

Total Number of Representations Received: 3

Date Site Notice Expired: 13 February 2019

Summary of Representations Received

An objection has been received on behalf of Aldi stores concerned at the retail impact and cumulative impact of the proposed use combined with the permission granted for the "*Food Warehouse*" at Unit 5, The Oaks Retail Park.

An objection has been received on behalf of Tesco store concerned that the Retail Impact and Cumulative impact tests have not been carried out correctly. Specifically, that there is a lack of a proper 'cumulative assessment' of impact to include the recent Food Warehouse opening. The applicants have listed Food Warehouse as an existing store making a claim against available expenditure but that is not how it should be done. Were a 'cumulative assessment' undertaken adopting the applicant's consultants 'simplistic approach' one gets a 10% impact on food and convenience retailing in the town centre. This is not a matter that the Council's Retail Impact Assessment Reviewer explored in their recent response.

PLANNING POLICY

SD1 (Presumption in Favour of Sustainable Development)

RS1 (Retail Hierarchy)

The Queensgate Retail Park is included at the bottom of the retail hierarchy but does not form a retail centre. The retail centres are: Harlow Town Centre, The Neighbourhood Centres and the Hatches. It is recognised that Retail Parks have a role by providing large retail warehouse units for bulky comparison goods.

RS2 (Future Retail Floorspace)

The policy identifies a need for 18,000 sq.m of comparison and upto 3,200 sq.m of convenience floorspace up to 2026 but also that the new villages of the Harlow and Gilston Garden Town will need to have their own Neighbourhood Centres and Hatches to support their additional populations.

RS3 (Protecting and enhancing existing Retail Centres)

The policy indicates that the role and function of the district's Retail Parks as a provider of bulky retail goods will be protected.

PL1 – Design Principles for Development

PL3 – Sustainable Design, Construction and Energy Usage

PR5 (Sequential Test and Principles for Main Town Centre Uses)

This indicates that Main Town Centre Uses must be directed in the first instance to the Town Centre unless there are no suitable or available sites. Also that Neighbourhood Centres and then Hatches must be considered before any Main Town Centre Uses are directed to Retail Park locations. Main Town Centre Uses within Retail Parks will be supported where all the criteria are met: sequential approach is satisfied, an active frontage is achieved at ground floor level, the vitality and viability of the retail centre is preserved and enhanced and is well related to public transport or located appropriately for sustainable transport provision.

PR10 (Development in Retail Parks)

Development in Retail Parks must meet the following criteria:

- (a) the sequential approach is satisfied;
- (b) the development is in Use Class A1 [Shops within new Use Class E*] and is for the sale of bulky goods, or provides leisure activities;
- (c) any sub-division does not result in any separate retail unit being less than 1,000sqm in size.

For sub-division, evidence must be provided to demonstrate that the existing unit has been actively marketed for Use Class A1 [Shops within new Use Class E*], to the satisfaction of the Council, for at least 12 months.

*Use Class E (1 September 2020) defines A1 shops as “shops, retail warehouses, post offices, ticket and travel agencies, sale of cold food for consumption off premises, hairdressers, funeral directors, hire shops, dry cleaners, internet cafes”. In the transitional period, planning Applications submitted before the change to Use Class E retain their “A1” category status and therefore benefit from related permitted changes of use under this use class until July 2021.

Use Class E also includes A1, A2, A3, B1, D1 and D2 and the sui generis “in a class on their own” uses – e.g. theatres, Large HMOs, hostels, petrol filling stations, shops selling and/or displaying motor vehicles, scrap yards, retail warehouse clubs, nightclubs, launderettes, taxi

or vehicle hire businesses, amusement centres, casinos, funfairs, waste disposal installations, betting offices and pay day loan shops.

It is expected that before the 31 July 2021 the restrictive permitted development changes will either be confirmed to cease (allowing any change to any other use within Use Class E without planning permission or prior notification) or a new/revised General Permitted Development Order will be applied (setting out new permitted development/prior notification changes).

Shops (former A1) may otherwise fall within new Use Class F2 “Local Community Uses” if they are less than 280 sq.m, sell essential goods and are at least 1km from a similar shop. This would not apply for the application site.

IN1 - Development and Sustainable Modes of Travel

IN2 – Impact of Development on the Highways Network including Access and Servicing

IN3 – Parking Standards

PLANNING STANDARDS

National Planning Policy Framework (NPPF) (2019) - sets out the Government’s key economic, social and environmental objectives and the planning policies to deliver them. These policies will provide local communities with the tools they need to energise their local economies, meet housing needs, plan for a low-carbon future and protect the environmental and cultural landscapes that they value. It seeks to free communities from unnecessarily prescriptive central government policies, empowering local councils to deliver innovative solutions that work for their local area.

Supplementary Planning Documents/Current Planning Guidance

The Harlow Design Guide SPD (2011)

The Essex Parking Standards: Design and Good Practice (2009)

Planning Practice Guidance (PPG)

Background

In relation to Harlow Town Centre, when the application was first received Unit 24 at the Harvey Centre was available and the proposal for convenience store sales failed the Sequential Test, failing to meet policy the requirements of policy RTCS1 of the Adopted Replacement Harlow Local Plan (July 2006) and the National Planning Policy Framework 2019.

The applicants requested the opportunity to respond to the Retail Expert’s comments and submitted further information in March 2020 regarding the suitability of Unit 24 for Lidl’s market model. The Council’s retail expert reviewed the information submitted and again considered that Unit 24 was capable of being used by Lidl even though their standard store layout would need to be revised to suit the current layout of the BHS and car parking would not be directly adjacent to the store, that it was not unreasonable, in line with the NPPF, that the Lidl’s configuration and market model be altered for existing units/car parking provision in Town Centre locations. The Sequential Test was considered to be failed again, contrary to Policy RTCS1 of the ADRHLP (2006).

Nonetheless during the first pandemic lockdown in Summer 2020, a new department store known as 15:17 signed a lease for the former BHS which was then taken off the market;

while it has yet to open (due in part to the pandemic resulting in less confidence in the comparison goods retail market and the 2nd lockdown preventing non-convenience stores being open) it is considered that the Sequential Test (that there is no other location currently available) is now met. As such, the proposal was then considered to meet the then requirements of Policy RTCS1 of the ADHLP (2006) and the then emerging Policy PR5 of the HLDP (Dec. 2020)

In addition, in Autumn 2020, the Planning Inspector confirmed that the emerging Local Development Plan with its Policies relating to retail was acceptable and, as such the emerging Policies carry great weight. As a result, the trigger point for a Retail Impact Assessment was lowered from the NPPF trigger of 5,000 sq.m to 500 sq.m; the unit size for the proposed Lidl then triggered the need for both the originally submitted Sequential Test and also a Retail Impact Assessment.

The Harlow Local Development Plan (HLDP) was adopted in December 2020.

Summary of Main Issues

The key issues for consideration in the determination of this application are: the principle of the development; whether the proposal represents sustainable development; the proposals compliance with the sequential approach; the impact on the vitality and viability of the town centre; and the proposed parking arrangement and resulting traffic impact. Main Town Centre Uses within Retail Parks will be supported where all the criteria are met: sequential approach is satisfied, an active frontage is achieved at ground floor level, the development is in Use Class A1 and is for the sale of bulky goods, any sub-division would not be for a unit of less than 1,000 sq.m, the vitality and viability of the retail centre is preserved and enhanced and is well related to public transport or located appropriately for sustainable transport provision.

Section 38(6) of the Planning and Compulsory Purchase Act 2004 requires applications for planning permission to be determined in accordance with the Development Plan, unless material considerations indicate otherwise.

The Adopted Harlow Local Plan (December 2020) represents the main body of the Development Plan and should therefore form the starting point for all decision making. The National Planning Policy Framework (NPPF) represents the current national policy position regarding retail development and is considered to be an important material consideration.

HLDP policy PR5 requires that proposals for retail and other development which attract large numbers of people will be determined on a sequential basis; the town centre is the most sequentially preferable location for retail development. The NPPF echoes the requirements of Policy PR5, and generally suggests that town centres should be promoted as the heart of communities and centres for growth. It is considered that these policies are compliant with the NPPF and are therefore up to date policies.

NPPF Section 7 states that Local Planning Authorities should apply the sequential test and should require an impact assessment if development exceeds 2,500sq.m. in floorspace where there is no locally set value. The locally set value is for retail uses outside of the Town Centre which exceed 500 sq.m in size to provide a retail impact assessment.

The retail park is located in an out-of-town location and the application proposes retail development. A sequential assessment must therefore be undertaken, together with a retail assessment.

The unit is located within a designated retail warehouse park. HLDP policy PR10 specifically relates to development proposals on retail parks. This policy specifies that proposals for development must meet the following criteria: a) the sequential approach is satisfied; b) the development is in Use Class A1 and is for the sale of bulky goods, or provides leisure activities; c) any sub-division does not result in any separate retail unit being less than 1,000 sq.m in size. The proposed development would not conform to the requirements of part b) of policy PR10, but parts a) and c) would be met.

The proposal is considered to be in conflict with one of the requirements of policy PR10, however, the NPPF suggests that town centre uses (of which food retail is one such use) are suitable within out-of-town locations, provided that there are no sequentially preferable sites for such development and the retail impact of the development is not harmful on higher order centres. The NPPF's position on town centre uses is an important material consideration which indicates that the development should not necessarily be rejected in principle.

Determining the sustainability of the proposal is an important material consideration (as set out at NPPF paragraph 11). There should be no presumption in favour of the development if it is found to be unsustainable; concerns regarding a proposal may therefore assume more weight in the overall balance in such circumstances.

Sustainability of Development

NPPF paragraph 8 sets out that there are 3 different elements to sustainable development: economic, social and environmental. Given the retail nature of the proposal, the economic element is likely to be most relevant; however it is important that all 3 elements are considered.

The applicant has submitted a Planning and Retail Statement (dated December 2019) in support of the scheme. The applicant states that the Lidl brand is defined as a Limited Assortment Discount (LAD) selling a limited range of discounted convenience and comparison goods. They generally occupy stores of between 1,500m² and 2,500m² gross offering a range of essential products with roughly 20% ancillary comparison goods, which change each week on a "when its gone, its gone" basis.

The proposal to bring back an existing retail warehouse into use would provide both goods for purchase and jobs for local people. There is a clear economic advantage of providing both. In terms of social sustainability, the scheme would provide jobs which would be mainly for local people which would be a social benefit. The applicants indicate that Lidl has its own programme to support staff to gain promotion through internal training. It is considered that this seeks to support the aims of policy PR4 (Improving Job Access and Training) which seeks to ensure development provides support through of the employment of local people.

The proposed development would result in linked trips with other out-of-town retailers within the Queensgate Centre, to the economic benefit of the existing retailers and the proposed use rather than benefits to customers, the town centre or the wider public. Given that the site is located 1.5km from the town centre and has restricted public transport connections (particularly in comparison with the town centre), the potential for linked trips with the town centre from the proposed Lidl is considered to be negligible. Consumer choice would be limited to offers within the Queensgate Centre; the consumer would otherwise have to travel to alternate destinations, at the expense of the environment, in order to benefit from additional choices. As for the previous use as a Toy retailer, the development would be heavily reliant on car travel. While new forms of vehicle are replacing petrol/diesel forms, increasing convenience shopping in a retail park would increase environmental concerns such as pollution, use of natural resources and personal carbon use.

The proposal would meet the economic part of the sustainable development equation. It is of concern that the social and environmental parts would be less clearly met, however, the details of the scheme need to be assessed before a conclusion can be drawn.

The Sequential Approach

The applicant has undertaken a sequential test within its submitted Planning and Retail Statement. This sets out the business model requirements. Lidl has a model based on keeping operating costs to a minimum in order to sell goods at a lower price. The statement states at paragraph 6.26 that *“all stores must provide the necessary floorspace to accommodate the standard minimum product range (approximately 2,000 lines) along with adjacent surface level car parking and servicing facilities. As the proposed operator is a national multiple, consistency in terms of products and services is essential and parking is required given the stores provide more than a “top-up” offer for most customers”*.

Further at paragraph 6.27 it states *“dedicated surface level car parking is required to ensure the majority of customers can undertake their food shopping trips by private modes of transport. Many customers undertake bulk weekly or bi-monthly food shopping and purchase perishable goods.*

Therefore customers expect stores to benefit from easily accessible, dedicated surface level car parking to allow an easy transfer of shopping from the store to vehicle. Without dedicated car parking, the overall viability of the Lidl would be affected”.

In their sequential site search, the applicants considered sites in Harlow Town Centre, The Stow Neighbourhood Centre and the Old Harlow Neighbourhood Centre. They conclude largely that most available units are of insufficient size to accommodate the development. In the case of the (then) vacant BHS store the applicants state that *“the unit comprises a total of 3,160 sq.m of floorspace configured over two levels. This size of unit is significantly larger than what is required by Lidl, therefore it is not suitable. However we note from marketing particulars that the unit may have the ability to be reconfigured to provide four smaller units”*.

Further at paragraph 6.35 it is stated that *“notwithstanding, Unit 24 does not have any direct and level customer parking, which is essential for Lidl’s business model. The unit is located approximately 150m away from the nearest car park. This is not suitable for customers with shopping trolleys or a number of shopping bags, given that the store is often used by customers undertaking both a ‘top-up’ and ‘main’ food shop. As set out above, car parking is an essential requirement for Lidl, an operator within the ‘LAD’ market, as well as all other mid-large foodstores”*.

This statement is however at odds with the fact that a number of Lidl’s stores do not have surface level parking and operate from town centre locations such as Kentish Town, Edmonton Green, the Stratford Centre and Aldershot. The requirement for the store to be served by adjacent surface level car parking and to have direct access by car should not be considered 'fundamental'. It is clear that Lidl stores trade in different locations across the UK, including town centres, many of which have no direct access to dedicated surface level car parking. To dismiss other sequentially preferable sites, on the basis of a lack of dedicated car parking is highly inflexible, and entirely contrary to the main thrust of the sequential approach in support of sustainable development and the town centres first policy approach; no matter what the operator's business model may be at any point in time.

The applicant provided a further document which detailed more reasons why the BHS was unsuitable, nonetheless the Council’s retail advisor again confirmed that that the applicants were not being sufficiently flexible in terms of the former BHS unit (24 Harvey Centre) and that this did not meet the sequential test.

The Council has been advised that 24 Harvey Centre has recently been the subject of a new lease to a new department store operator known as “15:17”. According to their website, the store was expected to open in December 2020 and an application for store signage was submitted in late December 2020. If the former BHS is occupied by 15:17, as appears so, this would mean that the former BHS unit would not be available and that there would be no sequentially preferable site either within the Town Centre or in an edge of centre location.

The applicant’s revised documentation indicates that there is no preferentially sequentially suitable site in Harlow Town Centre and, as such, that Lidl should be allowed at 1A Queensgate. The Council’s independent Retail Assessor agreed that with the removal of the BHS unit that it was no longer available and that there was no sequentially preferable site in the town centre such that the proposal for a food retail use would not result in harm to the town centre’s retail offer.

It is considered that the proposal would meet the provisions of Policy PR5 of the HLDP.

Impact on the Vitality and Viability of the Town Centre

When assessing applications for retail and leisure development outside town centres, local planning authorities should require an impact assessment if the development is over a proportionate, locally set floorspace threshold (if there is no locally set threshold, the default threshold is 2,500m² of gross floorspace). The proposed foodstore at the application site measures 1,951m² (GIA) and 1,100m² (net sales area) and therefore based on the newly adopted policies (and the threshold at 500 sq.m), a retail impact assessment is required.

In line with the new policy in the Local Development Plan (December 2020), the applicants were requested to submit a Retail Impact Assessment as the trigger point is met by the proposed development.

The applicants originally submitted a light assessment to support the 2018 application. The submitted assessment states that the majority of Lidl’s turnover (52%) will be diverted from stores in out of centre locations. It is anticipated that the highest level of trade diversion will be from the Aldi on First Avenue (19%) and Tesco on East Road (18%), due to the close proximity and the strong market shares that these stores have within the area in which the application site is situated. These stores (particularly Aldi) share a similar target market to Lidl.

The Council requested consultants to undertake a review of the retail impact assessment of the proposed change of use of Unit 5, The Oaks Retail Park to a Food Warehouse approved under reference HW/REMPVAR/18/00480. The study confirms that both stores (Aldi/Tesco East Rd) are ‘overtrading’ and therefore should be resilient to this impact through trade diversion.

The assessment submitted with this application sets out that an estimated 25% (£1.59m) of Lidl’s turnover will be diverted from Harlow Town Centre, resulting in an impact of 3.2% on convenience goods sales. The majority of turnover is expected to be diverted from Asda (15%) given its similar customer profile and proximity to the site and 8% of the proposed turnover will be taken from Tesco Metro.

Anticipated impacts of the convenience goods sales of neighbourhood centres are 1.3% on Church Langley, 2.7% on Staple Tye and 2.0% on Old Harlow. This low level of impact is clearly not significant and will not give rise to any concerns on the future vitality and viability of these centres.

The Retail Impact Assessment (as updated by the applicants in November 2020) was considered by the Council's independent retail assessor and was considered to result in some trade diversion from both the Town Centre and other centres including Church Langley.

The significance of any harm identified has to be considered in relation to any other material considerations.

Visual Impact

The physical works are all minor in scale and will not give rise to any detrimental impacts of any interested acknowledged importance. The external works are similar to those that have been previously granted permission under reference HW/FUL/18/00087 and would be required to meet the operational requirements of Lidl. There are no objections to the external alterations which are compliant with Policy PL1.

Parking and Highways Issues

A Transport Assessment (TA) which assesses the likely impacts of the proposed development on the surrounding transport infrastructure has been submitted with this application. It states that during the Saturday peak period, it is estimated that an additional 25 vehicles will enter the Queensgate Centre whilst an additional 43 will depart, the equivalent of one vehicle every 1 – 2 minutes each-way. It is anticipated that there would be a demand for an additional 46 spaces during the PM Peak and Saturday afternoon peak hours, with a lesser demand at other times which would not affect the availability of car parking. The car park will continue to operate within capacity under normal trading conditions.

The foodstore would be likely to receive an average 3-4 deliveries per day which would not affect the capacity of the local highway network, with deliveries taking place via the existing service yard to the north of the new unit.

The TA concludes that the proposed development is acceptable in highways terms, with no 'severe' impacts on the local highway network. The development thus is considered to accord with policies T3 and T9 of the Adopted Replacement Harlow Local Plan (July 2006).

No objections have been received from the Highway Authority.

Planning Balance

In reviewing the updated Retail Impact Assessment and Sequential Test, the Retail Advisor has indicated that the proposal meets the sequential test (that there is no sequentially preferable site in Harlow Town Centre or in an edge of centre location) but is concerned that the Retail Impact Assessment is partly-based on data which, in retail terms, is somewhat out-of-date. As such the Retail Advisor is unable to confirm that the scheme would not result in any significant harm to the vitality and viability of the Town Centre, or on other centres within the Retail Hierarchy. Notwithstanding, it would appear that any harm (if there is any) would be relatively small.

As such, it is necessary to consider whether the scheme would have any other material considerations which should be taken into the consideration.

The applicants indicate that there are a number of benefits of the scheme including that an existing vacant unit on a brown-field site would be brought back into a viable use, that there

would be employment for 45 people (expected to be mainly locals) and that the employer looks to promote from within such that there is a career-progression among staff.

HDC Regeneration Team offer their support for the scheme on the grounds that [a Lidl] would provide additional employment for the town and help to replace at least some of the many retail jobs that have been lost as a result of the impact of the Covid-19 measures and the longer term trends in the town.

Given the benefits of the scheme, it is considered that these material circumstances are sufficient to outweigh any harm to retail vitality/viability which may occur to the existing defined retail hierarchy due to a change from shop use for bulky, comparison goods sales to majority convenience (food) sales, such that the proposal is recommended for approval.

CONCLUSIONS

The application is for minor works and also for convenience sales (food and drink) contrary to the existing restrictive condition (attached to permission HW/92/00107) which prevents the use of the unit other than for bulky goods/toys.

It is considered that the Sequential Test (that there is no other location currently available) is met. As such, the proposal meets the requirements of Policy RP5 and point a) of Policy PR10 of the HLP (Dec. 2020)

The Retail Impact Assessment (RIA), as updated in November 2020 was assessed by the Council's independent Retail Expert to result in some trade diversion. However, the background data was considered not fully up-to-date and that the harm would be less than indicated in the RIA, such that it may no longer be significant.

It is considered that on the basis of the information submitted that there may be some harm to vitality and viability of the existing retail hierarchy. As such, in the event that some harm would be caused, consideration has to be given to whether there are any material circumstances which could be considered in favour of the proposal.

In this case, material considerations include that the warehouse store was already in A1 shop use at the time of submission of the application and therefore no change of use is proposed. The change from comparison to convenience food sales requires planning permission due to a restrictive condition attached to the permission for the store to only allow the selling of toys (Toys-R-Us) in addition to the original bulk goods list required under the original approval.

The proposal would result in bringing a currently vacant shop unit back into viable use and 45 f.t.e jobs would be available to local people.

It is considered that, on balance, while there would be a limited loss of trade which would be diverted away from other existing retail centres, including Harlow Town Centre, Staple Tye and Church Langley, the scheme would provide significant benefits in particular at a time when store-based retail job losses have been increasing and have been exacerbated during the Covid-19 world pandemic. Given that it is proposed to enable food sales, this would also provide a relatively stable source of income for local residents.

As such, it is considered that on balance the proposal's merits would outweigh the slight harm to existing centres and that the proposal should be granted planning permission.

RECOMMENDATION

That Committee resolve to **APPROVE** subject to the following conditions:

- 1 The external facing materials (including for windows and doors) to be used in the construction of the development hereby permitted shall be those materials specified on the application form submitted in relation to the development hereby permitted, unless alternative materials are proposed. Where alternative materials are to be used, no development shall commence before details of those alternative external facing (including windows and doors) and roofing materials to be used in the development have been submitted to and approved in writing by the Local Planning Authority. Where materials other than those materials specified on the application form are agreed in writing by the Local Planning Authority, the materials agreed shall be those used in the development hereby permitted.
REASON: In the interest of visual amenity and to accord with Policy PL1 of the Harlow Local Development Plan (December 2020)
- 2 Notwithstanding the Town and Country Planning (Use Classes) Order (Amendment) 2020, the use shall only be as a food supermarket within Use Class E and for no other use within Use Class E without a further planning permission being granted.
Reason: To retain control over development within the Queensgate retail warehouse park, in line with Policy RS3 of the Harlow Local Development Plan (December 2020)
- 3 The proposal shall be implemented in accordance with the details contained in the submitted draft Travel Plan, unless otherwise agreed in writing
Reason: To promote alternative ways to travel in line with Policy IN1 of the Harlow Local Development Plan (December 2020)
- 4 Prior to first occupation by the foodstore hereby approved, details for electrical vehicle charging points shall be provided; once approved in writing by the Local Planning Authority the charging points shall be implemented in accordance with the approved details and retained prior to customer use of the store.
Reason: To promote greener alternative travel in line with Policy IN1 of the Harlow Local Development Plan (December 2020)
- 5 The A1 unit shall not be sub-divided unless each unit formed would be a minimum of 1,000 sq.m
Reason: To retain the scale of development unit appropriate in an out of centre retail park in accordance with Policies RS3 and PR10 of the Harlow Local Development Plan (December 2020)
- 6 The development hereby permitted shall be carried out in accordance with the approved plans as shown listed in the table below.

REASON: For the avoidance of doubt and in the interests of proper planning.

| Plan Reference | Version No. | Plan Type | Date Received |
|----------------|-------------|----------------------------|---------------|
| 1340-U1A-LP01 | -- | Location Plan | 19.12.2018 |
| 1340-U1A-P01 | -- | Existing Floor Plans | 19.12.2018 |
| 1340-U1A-P02 | -- | Proposed Ground Floor Plan | 19.12.2018 |
| 1340-U1A-P05 | -- | Existing Elevations | 19.12.2018 |
| 1340-U1A-P06 | -- | Proposed Elevations | 19.12.2018 |

INFORMATIVE CLAUSES

1. The Local Planning Authority has acted positively and proactively in determining this application by identifying matters of concern within the application (as originally submitted) and negotiating, with the Applicant, acceptable amendments to the proposal to address these concerns. As a result, the Local Planning Authority has been able to grant planning permission for an acceptable proposal, in accordance with the presumption in favour of sustainable development, as set out within the National Planning Policy Framework.
