HGGT Developer Forum	Developers	Draft Oct 2020 (Consultation Version)	26/11/2020	RAG isn't best way to incentivise developer. When used as way Building for Life use it is more useful, as it allows for debate. But RAG status fixes on quantitative, and becomes stark, and takes away ability to have discussion. Risk is that it pushes developers into us and them situation, want Garden town to sit in middle of that as delivery and policy agency. Will you commit to exceeding building regs, yes or no. Grateful for points about healthy places and issues with securing healthcare provision (e.g. availability of GPs). I know my Public Health colleagues would concur with that point. Their call however would be to ensure that the design focus for Gilston & other HGGT developments is on creating a healthy place and promoting healthy lifestyles, thus switching the emphasis to a preventative approach with people living more active healthy lifestyles. Gilston has great opportunities for that - to capitalise on - and these can benefit the whole Garden Town, helping to address health inequalities too. The Healthy Town Framework should be treated as a prompt for the above approach / emphasis and the HIA process also promotes that approach and will help with it
