### 02 September – Ex-Jobs

20.40 Very quiet in the bar, faint music can be heard but doesn't sound like live music

22.30 Few people sitting drinking at the tables to the front of the pub. Can be heard talking but no shouting or ASB.

23.10-23.25 People sitting outside the front at the tables but no noise or ASB witnessed, just general chatting over a drink.

Pub closed 01.30 people waiting outside of the pub can be heard talking but no shouting. Several taxis pull up and by 01.45 everybody has gone.

### 03 September – Ex-Jobs

20.36 Very quiet bar looks empty

21.25 call from ██████ advising ██████ knows the pattern of the evening and can tell it's building up to be a very bad evening. ██████ further advised ██████ can hear balloons being filled with gas. I asked if ██████ thought it was kids with the balloons, ██████ was offended by me asking this and said ██████ was fed up with people blaming kids, they've never had a problem with kids and that it's people using the pub. ██████ also said that country and western music could be heard. ██████ asked several times where I was coming from and said ██████ felt bad about calling me out if it got worse. I didn't tell ██████ that I was in fact outside the pub. ██████ has sent a couple of recordings to Tracy O'Connell. Once we had finished our conversation, I went into the car park of the pub, there were about half a dozen people standing outside the back doors of the pub chatting, no music could be heard not balloons and no ASB witnessed.

22.10 People outside the front of the pub could be heard talking and laughing. There was a young couple with balloons in their mouth so I can only assume they were the ones ██████ had heard with the balloons and gas earlier (they were young, just about the legal age of drinking I'd say).

22.26 Van driving past the pub excessively bibbing its horn to get the attention of someone walking along the road. People are still outside the front of the pub shouting and laughing, 3 cars pull up and people get in and they drive off. A police car pulls up for about 30 seconds then drives off, few minutes later a police carrier came past on blues but didn't stop.

22.33 Front of pub is empty (See photo A)

23.36 Back car park empty, singer can be heard but not loud. Only a handful of people in the bar. (See Photo B)
